1 . **Website Design Plan – Home Page**
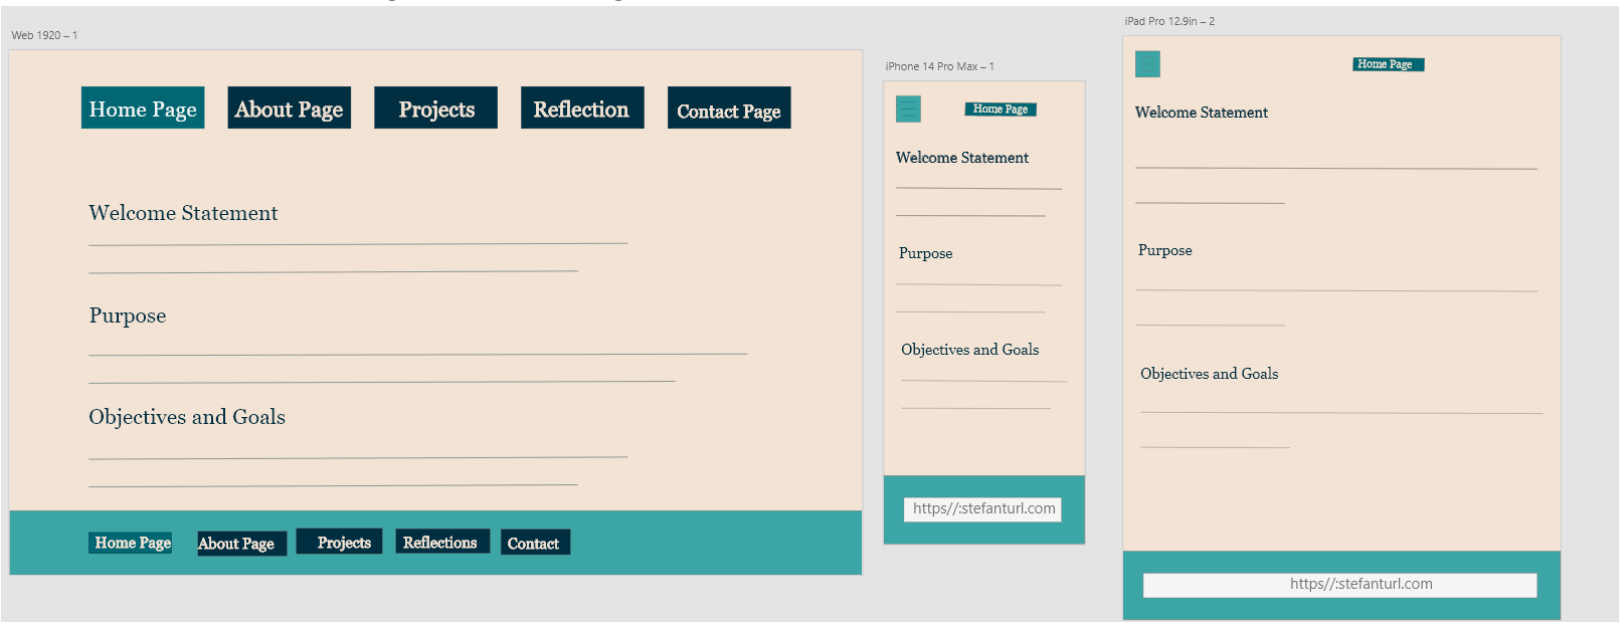

Include the Hex Codes for all colors used in your website design.

#012E40   #024959   #026773   #3CA6A6   #F2E3D5
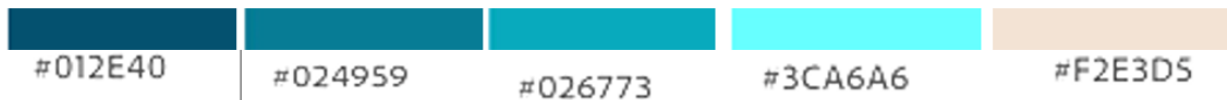

**Include the fonts** you will use on your website.

For headers and titles in my home page I will be using the text font **Georgia** because it is a traditional and professional fashion of presenting text. As for the body paragraphs I will be using a common body font such as **Lato**.

Content Inventory – For my content inventory I will be including a welcome statement section, a purpose statement, and an objective and goal statement. A header will guide you to other pages as well as a footer that does the same thing in case one scrolls away from the header.

Make a note of any background colors, images, or icons you want to include and where (you don't have to have these yet)

As for the home page, I do not have any icons or symbols relating to my name or professional self, other than a professional headshot which will be on my about page. My background color is going to be an off-white color as well.

2. **Website Design Plan – About Page**

Include the Hex Codes for all colors used in your website design.

#012E40   #024959   #026773   #3CA6A6   #F2E3D5

**Include the fonts** you will use on your website.

For headers and titles in my about page I will be using the text font **Georgia** because it is a traditional and professional fashion of presenting text. As for the body paragraphs I will be using a common body font such as **Lato**.

Content Inventory – For my content inventory I will be including a professional headshot on the page that will catch the eye of viewers first. I will also include an about me text section with at least 150 words, I will also include a link to the resume video as well as a header and footer with links to other pages.
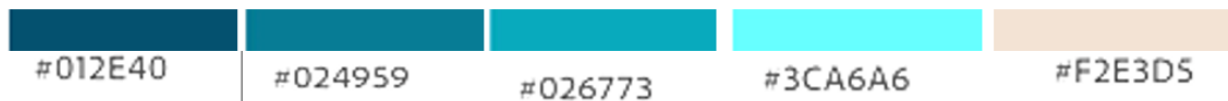

Make a note of any background colors, images, or icons you want to include and where (you don't have to have these yet)

As for the about page I will be using a professional head shot, and my background color is going to be off-white for every page. I cannot think of any icons to put on my about page. I feel that any Mizzou signage may be wrong as I am not representing Mizzou.

3. Website Design Plan – Projects Page

Include the Hex Codes for all colors used in your website design.

#012E40   #024959   #026773   #3CA6A6   #F2E3D5
  a. **Include the fonts** you will use on your website.

For headers and titles in my projects page I will be using the text font **Georgia** because it is a traditional and professional fashion of presenting text. As for the body paragraphs I will be using a common body font such as **Lato**.

  Content Inventory – For my content inventory I will be including a header and footer with reference links. Other things I will include on this page are 4 artifacts as well as 4 blurbs of text aside each artifact describing what the project and experience was like.
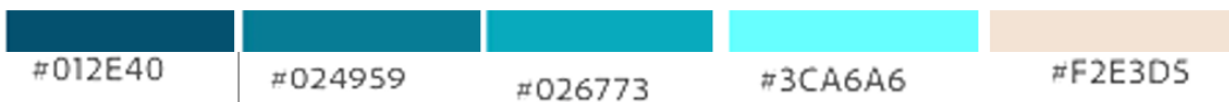

Make a note of any background colors, images, or icons you want to include and where (you don't have to have these yet)

As for the projects page, I will be using photos and other sources of media as my artifacts to show my projects. My background color is going to be off-white for every page. I cannot think of any icons to put on my projects page. I will also include a copyright logo at the bottom of the page.

4. Website Design Plan – Reflection

Include the Hex Codes for all colors used in your website design.

#012E40 #024959 #026773 #3CA6A6 #F2E3D5

**Include the fonts** you will use on your website.

For headers and titles in my reflection page I will be using the text font **Georgia** because it is a traditional and professional fashion of presenting text. As for the body paragraphs I will be using a common body font such as **Lato**.

> **Content Inventory** – For my content inventory I will be including a header and footer with reference links. The only other thing on this page will be a body of text title personal reflection with a reflection of my job and career experience.

Make a note of any background colors, images, or icons you want to include and where (you don't have to have these yet)

As for the reflection page, I cannot think of any images that would help support my personal reflection that are not on my projects page as artifacts. I will include a off-white or eggshell background color.

5. Website Design Plan – Contact Page

Include the Hex Codes for all colors used in your website design.

#012E40   #024959   #026773   #3CA6A6   #F2E3D5
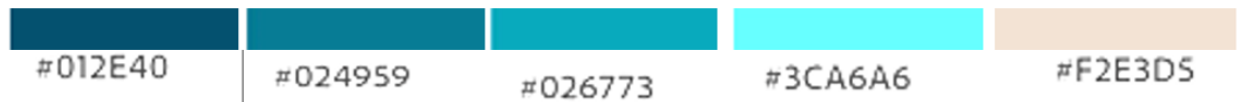

Include the fonts you will use on your website.

For headers and titles in my contact page I will be using the text font **Georgia** because it is a traditional and professional fashion of presenting text. As for the body paragraphs I will be using a common body font such as **Lato**.

> **Content Inventory –** For my content inventory I will be including a header and footer with reference links. This page's content inventory also includes a professional headshot, contact info that includes my name, number, email, and city. Also will include a contact form with a location to enter your email, name, and message.

Make a note of any background colors, images, or icons you want to include and where (you don't have to have these yet)

As for the contact page, I will be using headshots to help people identify the creator of the page and who they may be contacting. I will also include a phone icon next to my phone number and a mail icon next to my email. The background will be an eggshell or off-white color as each other one was.
